Hi Mark --

What great timing you have! I just got back from the art department requesting corrections on two structures.

Here are three pdfs, each with a set of structures that will get inserted into the finalized artwork. Your review of them is greatly appreciated!

I understand that our elected leaders have come up with a deal to fund the government for another three weeks and that all agencies should be back online tomorrow. What a crazy time.

Cheryl

Cheryl,

This seems fine however I do not see any chemical structures.

Mark

Subject: Three artwork documents for GenX cover story.docx

Hi Mark --

This is the rough draft of three separate pieces of artwork I am proposing to go with my story. Every chemical mentioned, from GenX to the Nafion byproducts, will run with its structure above its name. The drawing of the structures is currently going through C&EN's careful process.

I used the information you gave me to present smaller chunks for quicker comprehension and so people will be able to see it better on their phones (an increasingly important consideration in the way we present info here at C&EN).

Would you please read through these pages and correct anything that is wrong or otherwise incorrect? I don't need it back until next week, though I leave on a trip on Wednesday.

Thanks,

Cheryl

P.S. Hope you and your family enjoyed the snow!
